Dr. Ramon Batalla Professor Ad-Honorem of the Universidad Austral de Chile

Dr. Ramon Batalla, professor of the area of Physical Geography and responsible of the Fluvial Dynamics Research Group of the Department of Environment and Soil Sciences, conducts a research stay between 02/10/2017 and 12/17/2017 at the Universidad Austral de Chile. The research topic is water resources and river systems within the framework of the project 'Effects of global change in water resources and river dynamics in Mediterranean basins' financed by the CONICYT (Government of Chile. Advanced human capital attraction program). At the same time, Dr. Batalla has been appointed Professor Ad-Honorem of the

teaching staff of the Doctorate in Forest Ecosystems and Natural Resources of the aforementioned university. This is the second time that Dr. Batalla develops in the UCh, thus consolidating the collaboration between the Hydromorphology Laboratory of the Faculty of Forest Sciences and Natural Resources and the Fluvial Dynamics Research Group of the Department of Environment and Land Sciences of the University of Lleida.
