## Prof Rattan Lal invested Doctor Honoris Causa by the UdL

"Political stability and global peace are threatened by soil degradation, food insecurity and despair." This is how strong the new honorary doctor of the University of Lleida (UdL), the Indian scientist **Rattan Lal** [ <https://senr.osu.edu/our-people/rattan-lal> ], has been shown during his investiture. He sees them as "a real threat to security and intercontinental ballistic missiles" (ICBMs in English). This Professor of Land Science at Ohio State University (United States), member of the Intergovernmental Panel on Climate Change (IPCCV), which was awarded the Nobel Peace Prize in 2007, relates the quality of land With sustainable development and a lower risk of social upheaval.
